AMORSO-387B

Fluorine Modified Acrylic Leveling Agent

Introduction:

AMORSO-387B is an excellent silicone free flow flat agent with good miscibility, which can be used in solvent-borne transparent gold oil, paint and other pigments without affecting film gloss. Especially for acrylic / polyurethane series 2 liquid coating, light curing coating, baking paint system, it has very excellent leveling and defoaming effect. AMORSO-387B can also prevent crater, fish-eye, pinholes and other phenomena.

Features:

- better miscibility
- fast leveling

Technical data:

Composition: fluoroacrylic polymer

Appearance: light color liquid

Non-volatile part: 70%±2%

Solvent: aromatics/esters

Applications:

Applicable for all solvent-borne systems, recommended for:

- single-component air-dry/two-liquid acrylic/polyurethane coatings
- two liquid polyester resin/polyurethane coating
- baking coatings such as polyester resin / amino resin;
- acrylic/amino resin and alkyd/amino resin

Usage and dosage:

- It can be added before or after the grinding stages.
- 0.1%-1% of the total weight.

Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
