AMORSO-464

Adhesion Promoter

Introduction:

AMORSO-464 is a special polyester polymer, which is used to increase the tightness of the coating film to metals, minerals and some plastics, it has excellent miscibility and good gloss preservation ability.

Features:

- increase the tightness of solvent-borne self-drying, baking paint and other substrates
- increase film's gloss in acrylic and polyester system
- increase film's ductility
- prevent plasticizer migration

Technical data:

Composition: polyester polymer

Appearance: light color liquid

Non-volatile part: 80%±1%

Viscosity: O-U

Acid value: 25-35

Applications:

- solvent-borne
- industrial baking paint
- plastic paint
- wood paint
- car paint
- coil coating
- printing ink

Usage and dosage:

In general, the addition amount is 1%-5% of the total coating weight.

Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
