## AMORSO-465

### Adhesion Promoter

#### Introduction:

AMORSO-465 is a kind of double bond active functional agglomeration compound, which is used to increase the initial and permanent adhesion of the coating film to metals, minerals and some plastics such as PET, it has excellent miscibility. Because AMORSO-465 has good affinity to metal pigments, it is used to prevent silver paint from falling silver.

#### Features:

- increase adhesion of metal and plastic substrates UV light curing
- increase film softness
- prevent migration of plasticizer
- improve acid and alkali resistance, salt spray resistance

#### Technical data:

Appearance: light color liquid

Acid value: 100

Active substance: >80%

Solvent: alcohols

#### Applications:

- light curing coatings
- unsaturated coatings
- polyurethane coatings
- baking paint system
- vinyl chloride copolymerization coating
- chlorinated rubber
- ketones resin coatings
- PVC resin coatings, synthetic elastomer coatings
- synthetic elastomeric coatings

#### Usage and dosage:

In general, the addition amount is 0.05%-5% of the solid part in the resin of the coating.

#### Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage. ]
