AMORSO-480A

Adhesion Promoter

Introduction:

AMORSO-480A is a special polymer, which is used to increase the initial and permanent adhesion of the coating film to metals, minerals and some plastics, it has excellent miscibility.

Features:

- increase the adhesion of solvent-borne self-drying paint to substrate
- increase film gloss
- increase film softness
- increase the adhesion to PU and TPA

Technical data:

Appearance: light color liquid

Non-volatile part: 63.5%±2.5%

Solvent: esters

Applications:

resins, acrylic coatings, nitrocellulose coatings, saturated polyester coatings, polyurethane coatings, vinyl chloride copolymerization coatings, chlorinated rubber, ketone resin coatings, PVC resin coatings, synthetic elastomer coatings for alkyd/amino paint

Usage and dosage:

In general, the weight ratio of the addition against non-volatile part in the resin is 1%-5%.

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
