AMORSO-012B

Modifier

Introduction:

AMORSO-012B is a PU accelerator of tin-containing mixture, which can not only improve the reaction speed of PU paint, improve the drying function of paint film, but also have cooling effect. Compared with other metal drier, it has a longer usage time. It avoids the trouble of excessive addition of metal drier.

Features:

Tetravalent tin compounds promote the reaction rate of hydroxyl resin with isocyanate.

Technical data:

Composition: organic tin compounds

Appearance: light liquid

Active substance: 100%

Solvent : /

Applications:

- solvent system
- plastic paint
- car repair paint

Usage and dosage:

0.05%-0.2%

Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
