AMORSO-148

Smoothness Enhancing, Scratch Resistance, Handfeel Agent

Introduction:

AMORSO-148, a coating auxiliaries which is composed of modified linear structural siloxane and contains OH reactive groups. It provides smooth, anti-scratch effect in water-borne coatings, traditional solvent-borne coatings and high-solid coatings, it reduces the friction coefficient. This product has a crystallization tendency when the temperature is low which will not affect the physical properties.

Features:

smooth feel, scratch resistance and reduce the friction

Technical data:

Composition: siloxane with OH
Active substance: 100%

Appearance: light liquid/solid

Applications:

- solvent-borne/UV/water-borne system
- industrial paint
- plastic paint
- wood paint
- car paint/car repair paint
- coiled coating
- printing ink
- anti-corrosion coating

Usage and dosage:

0.1%-2% of the total formula.

Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
