AMORSO-193

Silicone Soft Feel and Scratch Resistant Additive

Introduction:

Far better handfeel than traditional organosilicone additive.

Features:

- modified polysiloxane to improve the surface properties of coatings
- effectively improve the film's smoothness, wear resistance and scratch resistance
- suitable for solvent-borne, solvent-free, water-borne and UV coating ink systems
- far better handfeel than traditional organosilicone additive

Technical data:

Composition: organosiloxane

Appearance: light color liquid

Active substance: 100%

Solvent: /

Applications:

- industrial baking paint
- coil coating
- wood paint
- car paint

Usage and dosage:

0.1%~1% of the total formula, dilute to less than 50% with solvent before use, then add it into resin to disperse fully for over 20 minutes.

Package:

25KG plastic or iron barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
