AMORSO-220

Acrylic Defoamer

Introduction:

AMORSO-220 is a special modified non-organic silicon defoamer with excellent defoaming ability. It has the function of fast defoaming for a large number of mechanical bubbles produced by mechanical stirring in the process of coating production, it has moderate miscibility, it can be used in transparent or semi-matting system. Especially recommended for the defoaming for primer, high viscosity system, thick hand brush, roll coating, spray coating.

Features:

- superior defoaming ability
- moderate miscibility, used in transparent or semi-matting system

Technical data:

Composition: non-organosilicon polymer

Appearance: light yellow liquid

Active substance: 40%±2%

Solvent: esters

Applications:

- solvent-borne
- industrial paint
- wood paint
- coil coating
- printing ink
- anti-corrosion coating

Usage and dosage:

General dosage is 0.05%~0.5% of total weight, can be added in any stage of the process(before or after).

Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
