AMORSO-233

Silicone-free Defoamer

Introduction:

AMORSO-233 is a special high molecular polymer, which has the functions of defoaming and leveling. It has good effect on eliminating bubbles in the process, breaking bubbles quickly in thick coating construction and eliminating pinholes. It is highly recommended for defoaming in primer, brush paint, roll coating, spray coating.

Technical data:

Composition: acrylics

Appearance: light liquid

Non-volatile part: 25.5%±2.0%

Solvent: esters

Applications:

Various solvent coatings: such as alkyd, acrylic, unsaturated polyester, epoxy coatings, polyurethane two-component coatings, baking paint and other systems.

Usage and dosage:

The additive can be incorporated during any stage of the production process (before or post grinding) , 0.05%-0.5% of the total weight.

Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
