AMORSO-1831

Salt Spray Resistant Agent

Introduction:

AMORSO-1831 is a polymer which can increase the salt spray resistance of the film and the substrate.

Features:

- used for heavy corrosion prevention, increase the amount of addition can obtain excellent results.
- suitable for all kinds of coatings and printing inks, can effectively increase salt spray resistance, corrosion and rust inhibition.

Technical data:

Composition: high molecular polymer

Appearance: light color liquid

Non-volatile part: 27%±2%

Applications:

- solvent-borne
- industrial baking paint
- plastic paint
- car paint
- car repair paint
- coil coating
- epoxy flooring
- anti-corrosion coating

Usage and dosage:

Can be added directly, for the purpose of generally increase salt spray resistance, add 0.2%-1%; for heavy corrosion prevention purpose, add 1%-5%.

Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
