## AMORSO-1835N

### Cooling Agent

#### Introduction:

AMORSO-1835N is an unsealed dinonyl naphthalene sulfonic acid catalyst, suitable for high temperature baking, because of its high polymerization purity, color phase is close to yellowish brown, it is more suitable for salt spray boiling series, excellent water resistance, excellent overbaking resistance, it also improves hardness and luster.

#### Features:

- excellent water resistance
- excellent overbaking resistance
- it also improves hardness and luster

#### Technical data:

Composition: DNNSA

Non-volatile part: 39.5%±1.5%

Appearance: light yellow to light brown liquid

Solvent: ethylene glycol butyl ether/ketone

#### Applications:

- solvent-borne/water-borne
- industrial baking paint
- coil coating

#### Usage and dosage:

- Add directly, addition amount 0.2%-1%.
- Select according to different temperature or amine based resin.

#### Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage. ]
