AMORSO-1838F

Cooling Agent

Introduction:

AMORSO-1838F is a DDBSA series acid catalyst, which has good catalytic property and excellent storage stability. It is suitable for high temperature baking. Because of its high polymerization purity, the color is close to yellowish brown, it is more suitable for salt spray and boiling resistance and improves hardness and luster.

Features:

high polymerization purity, the color is close to yellowish brown, more suitable for salt spray boiling series and it improves hardness, luster

Technical data:

Composition: mixed acid

Appearance: light color liquid

Active substance: >40%

Solvent: alcohols

Applications:

- solvent-borne/water-borne
- industrial baking paint
- coil coating

Usage and dosage:

- Add directly, addition amount 0.1%-2%.
- Select according to different temperature or amine based resin.

Package:

25KG barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
