AMORSO-131

Silicone Handfeel and Scratch Resistant Additive

Introduction:

AMORSO-131 can strongly reduce surface tension, it has good substrate wettability, shrinkage-proof effect and low foaming stability.

Features:

- reduce surface tension and wetting the substrate
- improve smoothness and anti-scratch performance
- low foam stability
- excellent compatibility
- good re-coating

Technical data:

Composition: organosiloxane

Appearance: light color liquid

Active substance: 100%

Solvent: /

Applications:

- UV light curing
- industrial coating
- wood paint
- car paint

Usage and dosage:

- May be added at any stage of the production process.
- Addition amount: 0.1%~1% based on total formula.

Package:

25KG plastic or iron barrel

200KG iron drum

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
