AMORSO-153

Reactive Organosiloxane, High Temperature Resistant

Organosiloxane System

Introduction:

AMORSO-153 contains bond highly reactive organosilicon and is used for UV light curing and improves leveling, scratch resistance ability.

Features:

reactive siloxane, salt spray resistant, chemical resistant, can improve the performance of the film more durable

Technical data:

Composition: double bonded siloxane

Appearance: light liquid

Active substance: 100%

Solvent: /

Applications:

- industrial baking paint
- coil coating
- car paint
- wood paint

Usage and dosage:

Pre-dilution or direct addition to the coating based on the supply form.
0.1%-1% of the total formula.

Package:

25KG plastic or iron barrel
200KG iron drum

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
