AMORSO-183

Silicone Hand Feel Scratch Resistant Leveling Agent

Introduction:

AMORSO-183 is an organosiloxane which is suitable for solvent-borne, solvent-free, water-borne and UV coating printing ink system.

Features:

- steaming resistance, boiling resistance
- improve the bad adhesion caused by stress
- increase the adhesion between layers
- can obviously improve the gloss, weather resistance and brightness of the coating
- will not reduce interlayer adhesion when re-coating
- comprehensive excellent physical properties, smooth and soft handfeel, good miscibility, good recoating and arrangement, a upgraded version of 187

Technical data:

Composition: organosiloxane

Appearance: light color liquid

Active substance: 100%

Solvent: /

Applications:

- industrial coating
- coil coating
- wood paint
- car paint

Usage and dosage:

Either pre-dilute or add directly into coating in supply form.
0.1%-1.0% of the total formula.

Package:

25KG plastic or iron barrel
200KG iron drum

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
