AMORSO-362

Acrylic Resin

Introduction:

AMORSO-362 is a soft acrylic resin, it plays a modification role in the system. It often goes with other resins, such as nitrifying cotton, greening tree species to increase adhesion, light stability and anti-aging properties. Because the resin does not volatilize, the flexibility of the coating does not change over time.

Features:

- light and saponification resistance
- good photostability and aging resistance

Technical data:

Composition: acrylics polymer

Appearance: light color liquid

Non-volatile part: >88%

Solvent: esters

Applications:

- nitro paint
- paper and filmed coatings
- adhesive wax
- plastic paint with high requirement for light stability
- metal paint
- go with chlorinated resins, such as Laroflex on various substrates to increase hydrolysis resistance

Usage and dosage:

AMORSO-362: esters/aromatics 1:1 dilution before use

Package:

25KG barrel
200KG drum

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
