AMORSO-514T

Anti-segregation Floating Agent

Introduction:

AMORSO-514T is suitable for self-drying PU, baking paint and light curing system. The polar groups are adsorbed on the pigment surface to obtain the following functions described in features, it will not affect the re-coatability under normal conditions of high temperature baking paint.

Features:

- prevent pigment from floating
- eliminate the formation of the Bernard vortex
- increase surface smoothness
- no hard precipitation
- better liquidity
- improved orientation of matting powders and pigments
- hole shrinking-proof

Technical data:

Composition: unsaturated polycarboxylate derivatives

Non-volatile part: 50%±2%

Viscosity: <A

Solvent: Esters / alcohols

Applications:

- self dry PU
- baking paint
- light curing system

Usage and dosage:

- 0.5%-2.5% of the total formula.

Package:

25KG plastic or iron barrel

200KG iron drum

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
