AMORSO-865

Sealed HDI Curing Agent

Introduction:

AMORSO-865 can effectively increase the alcohol resistance, chemical resistance, boiling resistance and appropriately increase the substrate adhesion and internal toughness. It can also be used together with AMORSO-015 as coating modifier to effectively improve the density of the coating bridge and can effectively reduce the unsealing temperature.

Features:

AMORSO-865 is a unique high molecular polymer.

Technical data:

Composition: MEKO sealed HDI trimer

Appearance: light color liquid

Active substance: 70%

Solvent: esters

Applications:

- industrial baking paint
- white coating
- coil coating
- baking aluminum coatings system

Usage and dosage:

Addition amount: 1%-20%, increase the addition amount based on customer's requirement.

Package:

25KG plastic or iron barrel

200KG iron drum

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
