# AMORSO-120T Modifier

## Introduction:

AMORSO-120T is a new PU promoter derived from organotin and has the function of phase transfer catalysis. It can not only improve the reaction speed of PU paint, but also have cooling effect. Compared with other metal drier, it has a long usage time. Avoid the trouble of excessive amount of metal drier.

## Technical data:

Composition: organic tin compounds  
Appearance: light liquid

Non-volatile part: 46% ± 3.5%

## Applications:

- solvent-borne
- industrial baking paint
- coil coating

## Usage and dosage:

Addition amount: 0.1%-1%.

## Package:

180KG drum

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
