AMORSO-454HS

Adhesion Promoter

Introduction:

AMORSO-454HS is a special polyester polymer, which is used to increase the initial and permanent adhesion of the coating film to metals, minerals and some plastics, it has excellent miscibility.

Features:

- increase the adhesion of solvent-borne self-drying paint to substrate
- have no impact on film gloss
- increase film softness
- prevent migration of plasticizer
- improve acid and alkali resistance, salt spray resistance, MEK resistance, chemical resistance

Technical data:

Appearance: light color liquid

Active substance: 70%±1.5%

Solvent: alcohols/esters

Applications:

- solvent thermoplastic system
- DV system
- baking paint system
- UV system
- WPE system

Usage and dosage:

In general, the addition amount is 0.5%-1.5%-7%, adjust the amount according to different applications.

Package:

25KG plastic barrel

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
