AMORSO-514P Dispersant

Introduction:

AMORSO-514P is suitable for medium-high polarity coatings and amine neutral waterborne coatings. The interfacial tension between hydrophilic pigments and hydrophobic substrates can be reduced and adsorbed on the pigment surface by polar groups.

Features:

- prevent pigment from floating
- eliminate the formation of the Bernard vortex
- increase surface smoothness
- no hard precipitation
- better liquidity
- improve orientation of matting powders and pigments
- hole shrinking-proof

Technical data:

Composition: organosiloxane

Active substance: 51%±2%

Appearance: light color liquid

Solvent: esters / alcohols

Usage and dosage:

Addition amount: 0.5%-2.5% of the total formula.

Package:

25KG plastic or iron barrel

200KG iron drum

Warrenty:

Sealed to store for 12 months

[The above data and specification is only for reference, customer should do the test based on different application and requirement to see if it is appropriate and suitable for their usage.]
